

Affordable Roundabouts: Smaller, Slower, & Safer for All Travelers

FREE WEBINAR: Wednesday, May 29, 2024, 9-11 AM PDT

Affordable Compact and Mini-Roundabouts are being implemented by state and local public agencies due to their low cost, quick delivery, reduced vehicle speeds, and ability to prevent up to 90% of severe crashes.

Join us for this free 2-hour webinar to hear first-hand about Affordable and Modular Roundabouts from the Washington Department of Transportation, the City of San Diego, and our own Caltrans intersection and safety experts.

This webinar will cover:

- Characteristics of Affordable Roundabouts and how they have been proven to be as effective as full roundabouts.
- Success stories from state/local public agencies who have installed Affordable Roundabouts.
- How the emergence of Modular Roundabouts featuring fabricated components make it possible to install small roundabouts in several days at a fraction of the cost.
